Control Your TV/AC/Music System & Projector remotely with our AIT Universal Remote & AIT Smart App

### RGB Mood Light Controller

Mood lamps are lighting devices that are used to establish a particular feeling or mood within a room. In some cases, this type of lamp may be a small device that is plugged into an outlet and creates points of light near the floor line of the room. Other examples of a mood lamp may be used to illuminate specific points along the walls or cast a soft light over a larger piece of furniture in the room.

- 16 million color options can be selected from application as well as Voice enabled devices like Alexa and Google Home
- Adjustable color temperature with dimmable light
- Operates on Wi-Fi 2.4 GHz.

### Video Door Phone

Video door-phone (also known as video door entry or video intercom) is a stand-alone intercom system used to manage communication between the entrance to a building (residential complex, detached family home, workplace, etc.) and a resident inside of the building. Using a video door phone, residents and visitors can communicate audiovisually. Video door entry is notable because it enables a person indoors to visually identify a visitor before deciding to allow that visitor access. Previous generations of intercoms limited in-unit residents to video communication.

### OPERATE REMOTELY & DAILY ON/OFF SCHEDULE FROM ANYWHERE

#### Who we are

AIT Service Corporation. stand for advanced information technology, it was founded in 2012 as an IT sales and service providing company. We try to upgrade our products and ensure to widen our segments regularly. AIT then entered SMART Home Automation in 2018 with pro-designed and trusted manufactured units. It is organized, styled, and produced entirely in India. (MADE IN INDIA). We create all smart home devices on our own and we take care of even the smallest detail of the projects. In just a few years, AIT is well known for providing the best quality products and for our after-sales services. We ensure to prioritize and take care of the needs of the client and also give them smart and secure home solutions at affordable prices. AIT Service has the purpose of proactively protecting your home and keeping you connected to it, no matter where you are. Our exclusive smart home technology does both so you can rest easy. We believe in fast delivery and reliable quality. Our company serves in Jaipur, Ahmedabad, Chandigarh, Amritsar, Ajmer, Vadodara, Bikaner, Surat, and many more. We are thankful to our customers for their remarkable support to us.

#### WHY YOU NEED AUTOMATION

- Managing all of your devices from one place makes the convenience factor enormous.
- Flexibility for new devices and appliances.
- Maximizing security.
- Mobile control of all utility that gives interconnectivity of all devices.
- decrease energy consumption.
- Improved appliance functionality with motion detection.
- Property management insights with video analytics.
- Customization
- Appliance safety.
- Get Smarter.

#### WHAT IS AUTOMATION

A home automation system will monitor and/or control home attributes such as lighting, climate, entertainment systems, and appliances. It may also include home security such as access control and alarm systems. A home automation system typically connects controlled devices to a central smart home hub. The control of the system is either wall-mounted terminals tablet or desktop computers or even a mobile phone application. Home automation has a high potential for sharing data between family members or trusted individuals for personal security and could lead to energy-saving measures with a positive environmental impact in the future
